6 per cent, with antisfactory values in gold and sliver.

MINES AND MILL

Milford Welcomes **Newhouse Selection**

Important to That Community-Enterprises to Start-Municipal Improvements Projected.

According to arrivals from Milford, and particularly those representing the mi-ning and subsidiary interests of Beaver particularly those representing the ming and subsidiary interests of Beaver county, the acceptance by Samuel Newhouse of the reins of management of the Majestic's operations is regarded in and around Miliford as the initial move toward making that one of the liveliest and best mining and railroad towns on the line of the Salt Lake Route. Not only is there a suggestion of mining and smelting activity in the talk of the population, but there are enterprises afoot that will make this once abandoned forwarding town assume a metropolitan character; and all is due to the fact that Newhouse was selected for and has assumed the management of the Majestic's interests.

Peter Martin of Miliford, one of the best known mining figures of the State and one who has spent the major portion of his life in the development of the mines of Beaver county, stated last evening that the moment Newhouse's name was mentioned in connection with the Majestic a new life seemed to pervade the town. Short though the period is since the announcement of the beginning of the deal, one enterprising promoter, formerly connected with the Salt Lake Route, has secured the necessary dynames and wire to establish an electric plant for the town of Milford, and these are actually on the ground at the present moment. The news of Newhouse's acceptance of the Majestic amagement was not received by Milford people until yesterday morning, but with its receipt the work of starting many new enterprises was at once arranged for it is stated that W. C. Thomas, the metallurgist of the Newhouse forces, will shortly go to Milford and will undertake with a sufficient force of workmen the repairing and overhauling of the Majestic amelter, and that with these completed the furnaces will be blown in for operation on the ore deposits that have already been blocked out in the mines of the company. This means increased activity in and around Milford, where the season has already been particularly good on account of the improvements in progress on the railroad and the deve county, the acceptance by Samuel Newhouse of the reins of management of the

INSPECTION OF BLACKBIRD.

President DuBois Returns From Copper Gulch.

President John E. DuBois and Messrs North and Amsden, of the directory of the Blackbird, returned yesterday mornthe Blackbird, returned yesterday morning from a visit to the properties of their company in Copper gulch. Beaver county. From the gentlemen it was yesterday learned that while they are pursuing only a moderate and very conservative campaign of development, the ore bodies are looking very promising and good percentages in copper are being obtained. As is well known, the Copper gulch properties are near neighbors of the Cactus, which is being developed under such a vigorous campaign by Samuel Newhouse, and is practically on the same beit. The gentlemen confected with the Black-

house, and is practically on the same belt. The gentlemen connected with the Black-bird were the guests, during their visit, of the Newhouse people, and were permitted to inspect the development in the Cactus mine and the Interior of the mill. So immense are the ore bedies now blocked out in the former that to the mining men who were inspecting it, it appeared that further development work would be unnecessary for a number of years, while as to the mill, its entire design and the placing and selection of the machinery made a special appeal to the experience of the Blackbird people. President DuBois left for Pordand last evening, accompanied by Mrs. DuBois, and Mr. North will return East in a day or two.

NEW YORK'S CONDITION.

Ore Bodies Behind Stock Advance Favorable Reports About Mine.

The stock of New York on the local market, after having been buffeted all week from one figure to a lower one, recovered in Saturday's transactions and sold at the close for a better figure than

covered in Saturday's transactions and sold at the close for a better figure than a week ago.

The advance of yesterday is not ascribed to manipulation, but to a report of considerably improved conditions in the property, which would seem to indicate that it will become one of the big things of Park City, where big things mean more than they do in most mining districts. The information that could be obtained yesterday is to the effect that the ore that was some time since encountered in the winze off the 40-foot level is looking better than at any previous time since its disclosure. The original discovery of this ore showed what might be designated as two separate ore bodies, both of the same proportions, being separated by a horse of lime. The dip of this ore chute is now reported as being toward the shaft, and the report on the street yesterday was to the effect that in following it the horse had nearly disappeared. This would mean that the entire width of the two bodies of ore is now converged and is in one.

Tintic Corporation.

Tintic Corporation.

The Eureka Reporter of January 27 says that a movement is on foot to consolidate four valuable claims near the Eaglo & Blue Bell and form a company to carry on development werk. P. J. Donahue, the well-known mining man, who is out from Salt Lake, made a trip over the ground today in company with Dan Martin and was very favorably impressed with the outlook. The four claims are the American Star and Blackbird, owned by Mrs. Denis Sullivan, the Townview, owned by Dan Martin and Mike Sammon, and the Granite, owned by James P. Driscoll and others. The ground is without doubt among the most valuable undeveloped territory in Tintic. Mr. Donahue will remain in Eureka until tomorrow.

Copper Output of Week.

The production of copper bullion by the valley smelters for the week ending yesterday was as follows:
United States, 200,200 pounds: Binsham Consolidated, 306,134; Utah Consolidated, 266,251; total, 937,306 pounds

STOCK MARKET REPORT.

Sensational Bound of New York; Stock Advances 9 Cents at Call.

A satisfactory reaction in trading was experienced in the single session of yes-terday on the local exchange, though experienced in the single session of yesterday on the local exchange, though trading was confined to but few lines. New York was the star performer of the day and did business to the extent of \$100 shares in total sales of the day, including all other stocks, of 18,000 shares. Perhaps the most satisfactory feature of the trading was the sensational advance of New York. Opening at 40 cents and selling freely at that figure, it advanced by fractions until at the close of the regular call it was up 4 cents in the bidding. The buying and selling movement was not over with, however, and at the open board the stock went up with bounds until it sold at 42 cents, the last sale of the day being a block of 2000 shares at that figure.

As an understudy to New York, Tetro occupied a good second piace on the boards, and did business to the extent of \$500 shares, including some short selling. A small block of Victor Consolidated went at 4 cents, and some Little Chief at 24.

The market closed on the following quotations:

Boston Copper Market.

Special to The Tribune.

BOSTON, Mass. Jan. 28.—Local securities continue to be the attractive features in our Beston market, where prices show an advancing tendency. The copper shares were almost neglected and the tone was hardly encouraing. In some instances fractional advances are seen, but the general list was practically neglected and only recorded a see here and there. Traders are not very enthusiastic on account of the heavy tone displayed by Amel-Hornblower & Weeks, brokers, 13 State street, Boston, and 16 Wall street, New York, furnish the following quotations:

Amaigamated ... 1777 \$17.622.5 \$72.55 Special to The Tribuno. furnish the rollowing quotations:

Stock Exchange **Annual Meeting**

New Governing Board Elected-Five Old Members on New Board-Secretary's Report.

Yesterday's annual meeting of the

hareholders of the Salt Lake stock and nining exchange promised to be a tame affair when the meeting was first called to order in the exchange rooms by President James A. Pollock of the governing board. A motion was at once made after the call for the meeting had been read; to vote in the entire old board excepting two members whose connection with the exchange had ceased dur-ing the year. The places of these two were then filled by nomination and a movement was started to have the secretary cast the unanimous vote of those present for the new board as nominated. This was not palatable to all the members present and failed of carry-ing, and other members commenced flocking in who had friends or favorites

James A. Pollock, W. J. Browning, H. W. Doscher, J. E. Thompson, J. Oberndorfer, W. H. Alexander, J. W. Hatfield, A. S. Campbell, M. D. Joseph.

Those of the new board who served last year and were re-elected are: Messrs. Pollock, Browning, Thompson, Oberndorfer and Campbell; the new members being Doscher, Hatfield, Alexander and Joseph.

The new board will probably elect its

The new board will probably elect its officers on Monday.

The secretary's report showed that on January 1, 1904, there was a balance on hand of \$616.11. The receipts during the year were \$3397.61 from all sources. The present floating indebtedness of the ex-change is \$223, and the expenses and disbursements during the year, aside from the floating debt, were \$2456.86, which leaves a balance in the treasury of \$717.75 after present debts are paid.

MINING AT GOOD SPRINGS.

New Nevada District Active-Many Properties Being Developed. Special to The Tribune

A correspondent at Goodsprings, Nev., The Keystone mill starts next week af-

ter sixty days' rest for repairs.

The Red Cloud is working a full force night and day and is developing some

promising ore bodies.

Crane and Wright of Long Beach, Cal, are developing a copper and gold property, and have a very fine showing on their group.

Crane and Wright of Long Beach, Cal, are developing a copper and gold property, and have a very fine showing on their group.

The Tam O'Shanter is being developed rapidly and has a great showing of silver and lead ores. So per cent lead and one thousand ounces silver.

A. E. Thomas has a force of men working on the Rose mine. This is a large iron vein carrying high-grade lead carbonates, and great things are expected of this property in the near future.

The Sait Lake Route Exploration company, with which H. S. Joseph of Sait Lake City is associated, has a force of men working on its properties here, the Hoosier group. The Hoosier is the pride of the manager, Mr. Harvey Hardy. It has five feet of high-grade lead ore, carrying upward of 40 per cent lead and well up in silver. The managersent is sacking ore for the first shipment. The Chiqueta is a gold mine and lies about one thousand feet west of the great Keystone mine. Some very high-grade gold ore is being sacked from this mine now.

The Mobile is the property of the Nevada Exploration company. Fisher Harris, Charles Orr and Fred T. McGurrin and others of Sait Lake are the promotives. The mine is capable of producing a great tonnage, as it has large bodies of carbonate ores blocked out now.

Burning Moscow Strike.

Burning Moscow Strike.

Information from Beaver county received in the city yesterday is to the effect that the small force of men that Matthew Collen has maintained at work in his Burning Moscow mide in the Star district encountered an important body of lead carbonates. The shaft on the property is down 20 feet but the miners were operating at a depth of about 100 feet and were exploring entirely new ground when the strike was made. The disclosure shows a body nowhere, so far as it has been opened, less than three feet in thickness, and of a very desirable smelting quality, carrying, in addition to its lead contents, values in silver equal to those that have been characteristic of the district.

Tonopah Stocks.

A comparison of Salt Lake and San Francisco quotations of yesterday on Tonopah stocks shows that Tonopah was more eagerly sought in San Francisco and that it was held within easier reach of the buyer than in Salt Lake. Tonopah Extension was in demand in San Francisco and was an offering without inquiry in Salt Lake, while Tonopah Midway, not quoted at all in Salt Lake yesterday, advanced in the bidding in San Francisco to 62 cents.

Park City Ore Shipments. Special to The Tribune. PARK CITY, Utah. Jan. 28.—The creshipments for the week follow:

Mining Notes.

Peter S. Martin of Milford, the prominent mining man of the southern part of the State, is on a visit here on mining matters. See a visit here on mining matters. Yesterday's receipts of ore by the Taylor & Brunton sampler were twelve cars of Tintic, one from Idaho and three frem Tonopah. Manager William J. Lawrence of the Columbus at Park City, left this morning for a visit to the property of his company and to note the conditions where the new workings have intersected the winze. While prosecuting assessment work on the Burglar mine near the Tenora at Tintic, Bullock Bros, of Frova are reported to have encountered a body of copper ore carrying over

6 per cent, with antisfactory values in gold and silver.

A letter from John W. Langley at Tenopah is to the effect that he has encountered a promising body of gold fock in the Anaconda-Tonopah which runs up to 10 in gold per ton and that he has good reasons to believe that he will make a mine out of the property.

Alva H. Gunnell of Grant's Pass. Ore, and owner of the Oregon Belle gold mine in that locality, is in Sait Laks looking up the meritand experience of the application of the cyanide process in Utah. His purpose is to establish a preliminary plant of thirty tons daily on his property and to increase this to a large plant if his ores prove susceptible to treatment by this method.

A. W. Chesterton, representing the Boston shareholders in the directory of the Con. Mercur and a resident of Massachusetta strived in Sait Lake yesterday morning and was closetted mest of the day with President John Dern, looking over the records of a year past of the operations of the company. Mr. Cheisterton has not visited Utah for more than a year. He will go out to Mercur on Monday in company with the president and will spend some time in an exhaustive examination of the property and its workings. A. R. Derge & Co.
